## RCH36 COMBI HOOK

### Why choose Combi hooks?

Combi hooks are better alternative to triangles with multiple systems because there is only one system to operate, maintain and re-certify. Furthermore, crew requires training only on one system hence reducing incorrect handling of system.

### VIKING RCH36 combi hook

VIKING has more than 30 years of experience in designing and manufacturing of hook systems. RCH36 is our innovative combi hook that can be used for both MOB and rafts. The intuitive round design with integrated holding handles ensure extra crew safety.

VIKING RCH36 combi hook is made of high quality material, making it corrosion resistance and 100% compliant.

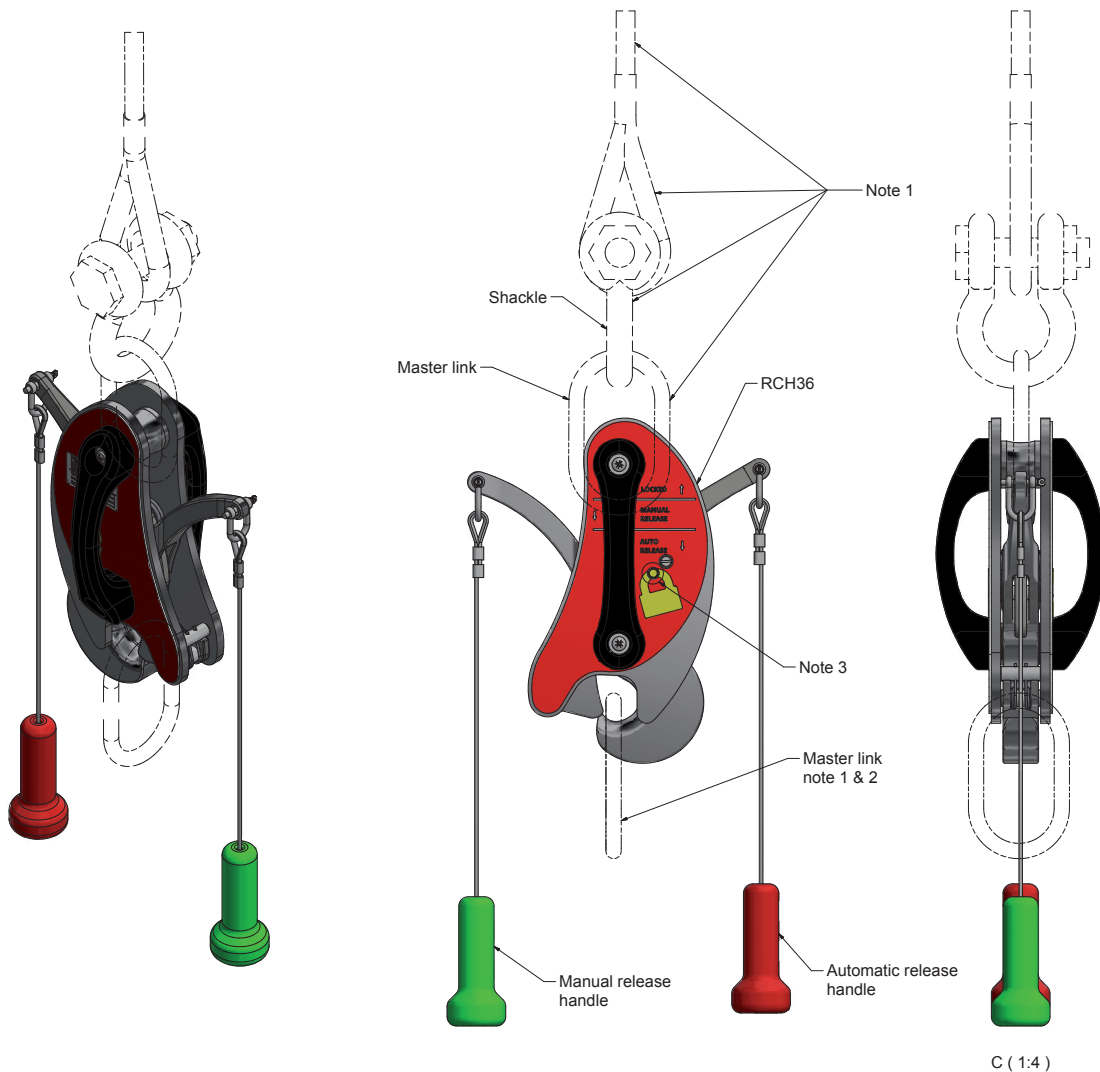

### Features

- SOLAS approved
- Automatic and manual release function for easy operation
- Ergonomic design with only few moving parts
- Highly resistant material ensures minimum maintenance
- Well labeled and visible instruction plates and padlock indicator for easy use
- Backed up by VIKING's cost-effective replacement program and local stock points
